Long Beach Water's

Lawn to

GARDEN

May 14th 2016

Tour

Register today for our Fifth Annual Long Beach Lawn-To-Garden Tour! The self-guided Tour is FREE for everyone.

Saturday, May 14, 2016
10:00 AM to 2:00 PM

You can tour many beautiful Long Beach Lawn-to-Garden landscapes throughout the City. Homeowners or representatives will be available at each home to talk about their garden transformations. Register today at www.lblawntogarden.com to receive your list of homes.

Long Beach's Conservation Target Continues

The Governor's statewide drought mandate will continue until October. We have to keep saving until October and beyond to make conservation a permanent way of life. Go to lbwater.org/mission to find easy ways to **KEEP** saving!

Water Quality

To Our Valued Customer:

In light of the Flint, Michigan water quality crisis, I assure you the drinking water in Long Beach is safe and of the highest quality. The practices that resulted in lead in Flint's water supply do NOT exist here.

This summer, we will be conducting compliance monitoring for lead and copper. If you are concerned about lead in your water from your home's copper or lead solder pipes, please call 562-570-2482 to participate in this free testing.

Be sure to read your annual Water Quality Report that further details the quality of our drinking water at lbwater.org/annual-water-quality-report. The 2016 report will be out beginning July 1, 2016.

Sincerely,

A handwritten signature in black ink that reads "Chris Garner".

Chris Garner, General Manager
